

Military Flight Training

December 6-8, 2017 | San Antonio, Tx
www.militaryflighttrainingusa.iqpc.com

The US Military Flight Training community is engaging on a mass modernization strategy due to the recent procurements of equipment like the F-35 and various rotary assets. As new aircraft are procured new skill sets and technological capabilities need to be learned and mastered in order to use new operational assets to their full potential.

Top 10 Reasons to Attend the 2017 Military Flight Training Event

- 1 Engage with 150 key decision makers across the US DoD, Air Force, Navy, Army and Marine Corps
- 2 Engage operational, procurement and strategic leaders defining the future of military flight training
- 3 Debate innovative 5th Generation Training plans and programs to prepare for the F-35
- 4 Review the latest updates on the US Navy's TH-57 replacement procurement
- 5 Solve the challenges facing LVC and Distributed Mission Operations to deliver cost effective training systems
- 6 Key insight into downloading potentials and practices across the training system
- 7 Unearth innovative ground base offloading practices to reduce training cost
- 8 Maximize system and immersion fidelity in flight simulation to open up increased offloading opportunities
- 9 Discover the latest opportunities for training service providers across the US Armed Forces
- 10 Engage with F-35 partner nations on their training plans and policies to position yourself for international market
